HELLENIC SHIPBUILDING INDUSTRY

# OUR VISION

**HSI is committed to being a trusted partner in the shipbuilding and repair industry.**

Our vision is to combine our know-how, advanced technical capabilities, and modern equipment to deliver projects of the highest quality — with safety, accuracy, and reliability guiding every stage of our work.

HELLENIC SHIPBUILDING INDUSTRY

# OUR SERVICES

**HSI provides complete solutions for all vessel types, covering every stage from repairs and conversions to NewBuilding projects.**

Our know-how, combined with modern equipment and skilled teams, ensures precision, safety, and on-time delivery.

## Services:

- Ship repairs & steel construction works
- Ship conversions
- NewBuilding projects
- Plate & piping fabrication
- Prefabrication & installation of Ballast Water Treatment Systems
- Prefabrication & installation of Scrubber Systems
- Painting, sandblasting & surface protection
- Naval architecture 2D & 3D plans & work progress reports

HELLENIC SHIPBUILDING INDUSTRY

# SAFETY & CERTIFICATIONS

## HSI places Safety, Accuracy, and Know-how at the core of every project.

With certified processes, specialized teams, and full compliance with international standards, we ensure reliable results and long-term value for our clients.

### Certifications & Approvals:

- ISO 9001 – Quality Management
- ISO 14001 – Environmental Management
- ISO 45001 – Occupational Health & Safety
- All required class approvals

# HELLENIC SHIPBUILDING INDUSTRY

## Experience at site on the engineering and installation of Exhaust Gas Cleaning Systems, EGCSs (Scrubbers)

## Tailor services for the EGCS installation

HSI provides comprehensive EGCSs/scrubbers installation services, tailored for both **retrofits** and **newbuild** ships.

We offer flexible installation options, whether in a shipyard, along- side the berth or, under specific conditions, even during voyage, minimizing ship downtime and ensuring operational continuity. Our end-to-end scrubber solutions cover every stage of the process, from meticulous pre-fabrication to final commissioning.

## All aspects are covered

HSI manages all aspects of installation, including the scrubber unit, hull modifications (new or modified tanks), foundations, piping (steel or GRE), pumps and state of the-art control systems. Every component is carefully integrated to guarantee optimal performance, efficiency and compliance with environmental regulations.

**With HSI, shipowners gain a reliable partner capable of delivering safe, high-quality and fully customized EGCS solutions, enhancing both ship's performance and environmental responsibility.**

## Advance materials experience

HSI brings extensive experience in handling GRE piping as well as advanced materials, including stainless steel, SMO alloys and other specialized metals.

Our team of highly skilled steel workers and certified welders is fully trained to work with these advanced materials, ensuring precision, safety and the highest quality standards during EGCS installations.

With HSI, clients benefit from unmatched technical expertise and reliability in every project, no matter how complex the materials involved are.

## Control panels installation

Installing control panels and automation systems for EGCS units can often be a challenging task due to system complexity and limited engine room space.

## For HSI this is routine!

Our experienced team works seamlessly with top-tier, reputable electricians and specialized electrical workshops, partners we have collaborated with for many years, to deliver reliable, precise, and efficient solutions.

Each project is meticulously planned, from initial system integration studies to onboard implementation and final commissioning. Our teams work in close alignment to minimize interference with the ship's daily activities, ensuring a smooth process and safeguarding operational continuity. By combining advanced engineering practices, proven partners, and a rigorous quality-control framework, we guarantee installations that enhance system performance, support long-term reliability and provide shipowners with complete peace of mind.

**HSI brings a deep understanding of EGCS automation, enabling us to undertake even the most demanding installations with confidence.**

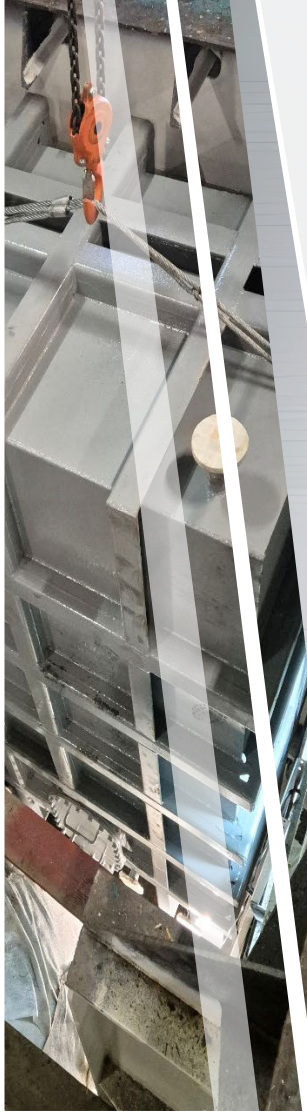

## Control panels installation is a challenging work!

The Hellenic Shipbuilding Industry engineering team collaborates seamlessly with leading electricians and well-established electrical workshops, long standing partners who have repeatedly demonstrated their reliability and technical competence.

Through these strong professional relationships, we are able to coordinate every phase of the project with precision, ensuring that all electrical and automation tasks are carried out to the highest standards.

This integrated approach allows us to deliver solutions that are not only accurate and efficient, but also consistent across different ship types and installation complexities.

## Secondary and auxiliary machineries installation

HSI offers full-service installation of all secondary machinery associated with EGCS/ scrubbers, ensuring seamless integration and peak performance.

From pumps and blowers to valves, heat exchangers and auxiliary tanks, the HSI Team is fully equipped to handle the entire range of equip- ment that supports EGCS operation.

HELLENIC SHIPBUILDING INDUSTRY

## Complex installations experience

Our skilled engineers, steelworkers and technicians bring extensive ex perience with complex installations in confined shipboard spaces, guaranteeing precise alignment, secure foundations and optimal system functionality.

## Collaboration and long-lasting relationships with trusted Subcontractors

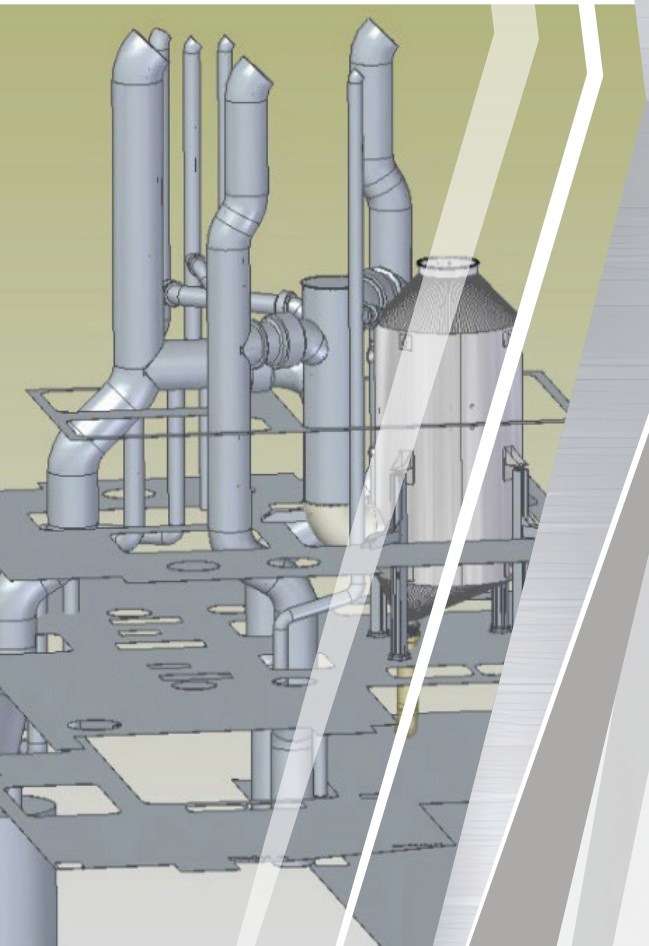

Leveraging close collaboration with trusted suppliers and specialized workshops, HSI delivers turnkey solutions that are efficient, reliable and tailored to each ship's unique configuration.

With HSI, shipowners benefit from a partner capable of managing every component of EGCS secondary machinery installation, minimizing downtime, maximizing performance and ensuring regulatory compliance.

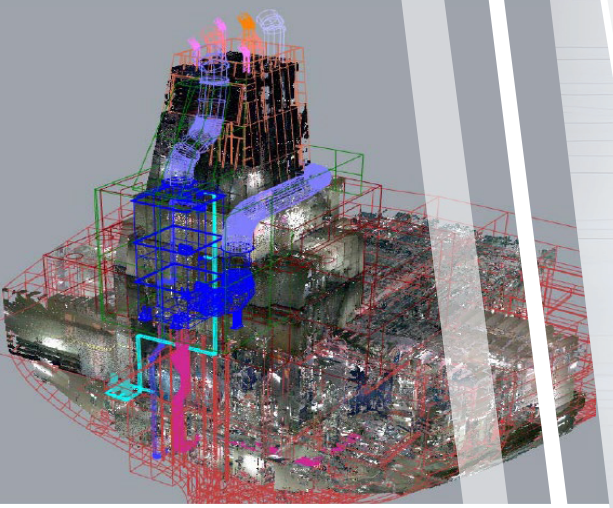

## Turnkey EGCS Solutions in partnership with STUDIO NAVALE

Our team of highly skilled engineers and technicians brings a wealth of hands-on experience in shipbuilding, conversion and repair, ensuring that every stage of the project is executed with precision and professionalism. From the initial engineering assessment and detailed planning to onboard supervision and final commissioning, all phases are carefully coordinated to achieve optimal results.

Shipowners can have full confidence that the EGCS installation will be executed on **schedule**, within the **agreed budget** and in full accordance with the approved technical specifications and class requirements. This comprehensive approach ensures a reliable, high performance system that enhances the ship's environmental compliance and operational efficiency.

## Turnkey EGCS Solutions in partnership with STUDIO NAVALE

HSI, in collaboration with Studio Navale, offers comprehensive turnkey solutions for the installation of EGCS, providing shipowners with a seamless, end-to end service.

- For the new installations, our process begins with precise 3D scanning of ship spaces and a detailed feasibility study, progressing through full engineering design, class approval documentation and final installation of the selected unit.
- For projects where the scrubber unit has already been chosen HSI and Studio Navale step in to review existing engineering documents, optimize installation designs and provide on-site supervision with detailed reporting to shipowners.
- For “backpack” installations, where the scrubber is integrated within a funnel extension, HSI ensures the prefabrication of funnel plates, a critical factor for efficient and accurate installation.
